

Consultant Profile: Walther Baumgartner

Senior Consultant

My Personal Approach

- ▶ We are what we think
- ▶ Self-responsibility
- ▶ Curiosity
- ▶ Appreciation

I get the joy and effort of my work with people from the belief that all sources of successful life design are available in every individual and can be accessed through curiosity in oneself.

... means to me to express the highest appreciation in people for their autonomy and equality.

... means to accept the laws of nature. It needs to be sown so that the fruits can be harvested after a period of ripening.
